

# Paper Trail

## A Place for Everything...And Everything in its Place!

An early prediction of the paperless office was made in a Business Week article as far back as 1975. Meant to describe the office of the future, improvements in copiers, printers and email has instead greatly increased the number of documents printed; resulting in the proliferation of paper.

"They" say that if you spend more than 30 seconds looking for paperwork on your desk you're not only wasting time you are wasting money! The solution then lies in a brilliantly efficient filing system which helps you keep track of your paper trail.

Whether it's for:

-  personal/active filing
-  group filing or
-  archival storage

CN offers the most integrated system available so that everything can be tracked, traced, in its place and at your fingertips.

Anyone in business knows that good systems are at the centre of operational success and the company's filing system is at the heart of this process. **Call Sabrina O'Hagan (011 345 1500) to find out how CN can help you maintain and manage your paper work.**
